EDUCATION *Bachelor of Science (B.Sc.), Computer Science (Honours & Co-op)*
Concentration in Intelligent Systems
Brock University, St. Catharines, Ontario Sep 2007 - expected Jun 2013

TECHNICAL SKILLS	<i>Software Development:</i>	C++, C, Java, Prolog, Python,
	(in order of proficiency)	Linux Shell Scripting, Ruby, LC-3 Assembler
	<i>Web Development:</i>	HTML, CSS, JavaScript
	<i>Mobile Development:</i>	Android, Windows Phone 7
	<i>Source Control:</i>	Git, Subversion (SVN), GitHub, Google Code
	<i>API's/Libraries:</i>	OpenGL, jQuery
	<i>Technical Writing:</i>	L ^A T _E X, UML, Markdown, reStructuredText
	<i>Business Collaboration Software:</i>	MS SharePoint, IRC, Trac, phpBB3
<i>Database:</i>	SQL	
<i>Operating Systems:</i>	GNU/Linux, MS Windows (XP/Vista/7)	

EXPERIENCE **Free and Open Source Software Learning Centre** Sep 2011 - present
Contributor & Mentor for Freeseer project

- Wrote and maintain Freeseer's comprehensive documentation
- Collaborate using agile and open source processes in a distributed environment
- Provide mentorship to student interns who contribute through Google Summer of Code (GSoC) and Undergraduate Capstone Open Source Programs (UCOSP)

Ministry of Transportation of Ontario May - Dec 2010
Systems Analyst (Co-op Student) St. Catharines, Ontario

- Team member of the Business Support, Policy & Planning Unit. Responsible for assisting clients in the ministry with consultation, technical support, and software solutions.
- Worked with supervisors, co-workers and consultants to architect, fabricate, and maintain a new ministry-wide Intranet which utilized SharePoint 2007.
- Responsible for updating the Major Applications Portfolio Strategy (MAPS) database. Interviewed several project managers in a timely fashion to extract information from 30+ projects. Project information is used for risk assessment.
- Refactored an embedded security request form that was used throughout the Ontario Public Sector to request new keycards. Improved performance and design, implemented new features, and fixed bugs. Wrote approximately 1000 lines of negative code by removing redundancies & using more concise constructs.
- Collaborated with business architects on the Training Management System project to produce class diagrams, system context diagrams, system use case models, an access control matrix, and a GUI design specification guide.

Maestro Media Center Sep 2009 - Apr 2010
Deputy Leader St. Catharines, Ontario

- Demonstrated strong leadership skills as the deputy leader of a 7-person team for a 3rd year Software Engineering course at Brock University.
- Used agile software development methodologies to create a fully functional, cross-platform, media center. See code.google.com/p/brockbots
- Utilized strong communication and listening skills when dealing with the client (our professor) and teammates on a weekly basis via meetings and emails.
- Demonstrated the ability to work effectively in a team and set and achieve realistic goals by organizing, planning, and executing tasks and meeting deliverables on schedule.
- Maintained a positive attitude during minor project failures and encouraged teammates rather than discouraging them. For example, influenced teammates to use pair programming when they were having difficulty with some coding tasks, which resulted in quicker completion, more team communication, and an overall better understanding of the project for those involved.
- Received an outstanding peer review and successfully delivered a project on time with my team. Our team produced the highest graded project that year.

GenieKnows Inc.

Jan - Apr 2009

Data Specialist (Co-op Student)

Halifax, Nova Scotia

- Enhanced business data for results used to provide the search and mapping features of GenieKnows Local Search (now yellowee.com). Responsible for collection of data from various sources through Automated Data Collection.
- Daily duties included: identifying data requirements, researching data sources, automating the downloading and processing/formatting of data, evaluating data quality, writing technical documentation, logging bugs, and logging progress.
- Simulated user activity to overcome the “ghost town” effect shortly after user profiles and business reviews were introduced.
- Researched methods and implementations of specialized crawling and presented findings to R&D team. Utilized knowledge to develop specialized web crawlers for pages on the Surface Web and Deep Web.
- Collaborated in teams to present creative ideas during research meetings and company-wide brainstorming activities.

Antek: IT Solutions & Software

Jun - Sep 2008

Computer Technician (Holiday Worker)

Sint Maarten, Caribbean

- Utilized creative problem solving skills and an analytic approach to set up, diagnose, and repair computers, hardware, software, and networks.
- Assisted clients with friendly customer service and technical support.
- Quickly adapted to different work environments and situations when executing tasks at diverse organizations and working in a team or individually.
